The view tree

First column

After an initial search, you arrive at the view tree, which currently only has one column.

Initial search results

A) Resuming your initial search criteria

B) Indication of the number of results from your initial search

C) List of results limited to the smallest number between the maximum number of results allowed for display and the number of results from the initial search.

D) Depending on the number of results, a scrollbar allows you to navigate through the results authorized for display.

Each result displayed in the list is clickable.

Second and third columns

Two columns of the view tree

Clicking on a topic idea gives you access to the details of this idea. This point is explained in another bellows of the accordion display.

A) In the detail of an idea, you can explore that idea. It then changes color in relation to the other ideas.

B) Exploring point A) above generates a new search, the result of which is displayed in the second column of the view tree.

You can repeat this operation on an idea from the second column. The result will be displayed in the third column.

resizing the view tree

A) To do this you need to position yourself between two columns. A large vertical line appears and your cursor changes shape.

You need to move this vertical line to widen or narrow the column in question.

Example of resizing the view tree

In this example, column 2 was narrowed and column 3 was widened.

resized view tree

A) A horizontal scrollbar allows you to navigate through the resized columns to reach the entire view tree.

Colors in the view tree

You will find three colors in the view tree.

Which of Press would be an example of lacquerwave	How to remove security software from computer How to clean infected computer	What was the first computer virus created How to clean computer from virus for free
What is a sourt for unawareness The scale to assess unawareness of mental disorder Ben sells housewares through his website	New car pool prevent a tragen install Why should you update your antivitus software regularly Which is the heat descention of a corescilar store	What are the less main types of computer visus
What is languarment made then can you prevent from being influenced by malescent What do you understand by the term loweans Devices for catching contextue unsearces dan word What is a search convert What is a search convert	What can you do to stop a computer vivus How do you prevent injen horse vivus Your computer has been infected by apyware What is another name for malicous software What is computer vivus fixes and examples & endoirse accomputer vivus fixes and examples	How do I know it my phone has heper what How to detect maticipus links How to detect maticipus links How to disable antivipus hom windows 10 How do incom it appears is on my computer Infects the executables as well as the boot exclore Union to desting discound executed

Colors of the view tree

A) The first color is white. This is the most common color. It means that the topic idea has not yet been explored or is not selected.

B) The second color is blue. This means that the topic idea is being explored. When it comes to the fourth column, it means that the idea is selected.

C) The third color is orange. This means that the topic idea has been explored, but it is not currently selected.

These different colors allow you to see the current progression and the ideas already explored.

Detail of a topic idea

When you click on a search result, the details of the relevant topic idea are displayed.

Detail of a topic idea from the view tree

A) Replays the title of the search result you just clicked on.

Zone B) This zone has 4 buttons allowing you to perform several actions related to the selected topic idea: automatic exploration, manual exploration, adding to a list and exporting.

Area C) This area displays the details of the topic idea. It has 2 parts: contents and entities.

We will first explain zone C before going into zone B in more detail.

Zone C

Contents of a topic idea

The contents tab

A) « Contents » is the first tab in the detail of a topic idea.

B) Here you will find the list of signs associated with the current subject idea.

Entities of a topic idea

---	------	--	---

The entities tab

A) "Entities" is the second tab in the detail of a topic idea.

- B) Here you will find the list of entities associated with the current topic idea.
- C) For each entity, you have a link (wp) to its Wikipedia page.
- D) For each entity, you also have a link (wd) to its Wikidata page.

Zone B

-				- 3 -3-
Automatic exploration	Manual exploration B	Add to list C	Export	Zone B
	The action	area		

A) Automatic exploration: The Online Service will explore the current topic idea itself. It will offer you results that have signs in common with this idea. These results will be displayed in the column following the column of this idea.

B) Manual exploration: You will have to select signs, up to ten (10). Then, the Online Service will explore the current idea according to the signs you have chosen. The results will be displayed in the column following the column of this idea.

C) Add to List: This button allows you to store the current topic idea in an existing or newly created list.

D) Export: This button allows you to export the current idea. You will find in the generated file the signs and entities making up this idea.

We will now look at these four actions in detail.

Automatic exploration (columns 1 to 3)

Warning: this automatic exploration is experimental, but it gives good results for English searches. These results are often better than those of manual exploration.

1) You select an idea. Its details are displayed below the list of ideas.

- 2) You click on the "Automatic exploration" button.
- 3) The exploration result is displayed in the next column.

There may be some time between step 2 and step 3 above. A waiting screen keeps you waiting.

Exploring the last column

Types of chriseware and their uses Type to detect minutes on android
Selected expression: how to detect malicious links ontrue the decovery tom the selected expression annel explosion, Cick or one or nove checkboses within the link of lan, in the "sensers" also below, to choose your own decision.

Exploration of the last column

1) You select an idea in the fourth column. Its details are displayed below the list of ideas.

2) As we have limited to 4 columns, you don't have access to the explore buttons.

Add to a list

1) You select an idea from the results list.

2) You press the "add to list" button.

A window opens offering you two options.

Zone D Add this idea to:	Zone E
An existing list	A new list
Select a list 🗸 🗸 🗸	Enter a new name
Add	Create and add

Options for adding an idea to a list

Zone D allows you to add the selected idea to an existing list. Zone E allows you to create a new list and add the selected idea to it.

We will first explore this zone E before returning to zone D.

Zone E

- 1) Enter the name of the list in the field.
- 2) Press the "create and add" button.

This last action will first create a new list whose name will be the one entered in field 1. Then, it will add the selected idea to this list.

A confirmation message will then appear.

Zone D

Add an idea to an existing list

1) Click on the drop-down menu. You will see the names of the existing lists. You must click on its name to choose a list.

An existir	ng list	
malware	1	~
Add	2	

add to existing selected list

- 1) The drop-down menu displays the name of the selected list.
- 2) Press the "add" button. This will add the current idea to the selected list.

A confirmation message will then appear.

Export an idea

	n to open: -2025-01-15.csv xt File (3.6 KB) netamots.xyz efox do with this file? BBEdit (default) matically for files like this f

Save the file

1) Pressing "ok" will allow you to save the file to your device.

In the file you will find the following information:

- the selected idea,
- his signs,
- its entities.

You will also find, for each entity, its Wikipedia link and its Wikidata link.

New search

As long as you explore the ideas in the view tree, you remain in the universe of your initial research.

To change this initial query you need to make a new search. To do this you need to use the "new search" button from the menu in the right sidebar.

New initial search

You will then go to the initial search screen.

The ideas

Search Restrictions

1) You can do your research as long as you do not exceed the daily quotas and the quotas for periods of 30 consecutive days.

2) We only display a limited number of results per query.

3) Quotas and limitation of results displayed are at our sole discretion and are subject to change without notice.

4) The automatic exploration is experimental, but it gives good results for English searches. These results are often better than those of manual exploration.

5) Some ideas are not discussed. In fact, we prohibit certain themes. These are at our sole discretion.

6) The images of the different bellows of this accordion are there for illustration purposes to help understanding. They have no contractual value.
